PROFILE

Internet Application Developer / User Experience Designer with over 17 years experience in all aspects of developing online business websites, systems, and services.

PROJECT EXPERIENCE

ListingWare.com Website Property Listings Search

Utilized: ColdFusion, PHP, MS SQL Server, MySQL, Windows Server/IIS, HTML/CSS/Javascript

System for displaying active MLS listings that are branded and linked to websites of Real Estate Professionals. Allows Consumers to search and provides leads to Agents or Brokers. System adapts to mobile or desktop display. Back-end system for daily downloading and updating of listing data and photos. 50+ MLSs nationwide. Service ordering, payment, and provisioning system. Complete website creation and hosting using customized WordPress CMS.

CreditCoachingSystem.com Consumer Credit Improvement System

Utilized: ColdFusion, MS SQL Server, Windows Server/IIS, HTML/CSS/Javascript

Self-guided system for coaching Consumers to improve their own credit scores. Allows for Partners to have privately-branded version of the system. Ordering, payment, and provisioning system. Integration with Social Media services. Responsive Design for mobile and desktop displays.

Vacationistas.com Vacation Rental Advertisement and Reservations

Utilized: ColdFusion, MS SQL Server, Windows Server/IIS, HTML/CSS/Javascript

Website for allowing vacation rental property Owners and Managers to display and manage property data and photos. System allows public property searching and availability inquiries by Vacationers.

Corporate Psychology Resources/TalentQuest Employee Review and Assessments

Utilized: ColdFusion, MS SQL Server, Windows Server/IIS, Crystal Reports, HTML/CSS

Online system for gathering feedback on Employees from Managers, Peers, and Subordinates. Multiple modules for survey and report creation and delivery.

AtlantaMLS.com Public MLS Listings Search

Utilized: PHP, PostgreSQL, Unix, Perl, Proprietary DOS Software

First-ever online system for displaying MLS listings directly to Consumers. Back-end system for daily downloading and updating of listing data and photos. Messaging system for Consumers to contact Agents and Brokers.
